

LUNA SPOT (MR16/GU10)

LightSymphony™

Light Symphony's Luna Spike Spotlight is an adjustable spike light ideally suited for garden use - lighting borders, shrubbery, highlighting focal points and up lighting small trees & pergolas.

By fitting LED lamps these outdoor spotlights become very cost efficient to run and are ideal for up-lighting newly planted borders or individual feature plants.

A flush glass lens prevents water accumulation and a powder coated body protects it against outdoor weather conditions.

An 18cm long spike allows you to position them just about anywhere making it a versatile addition to any garden.
